**EVERYMAN CHESS**

easy guide  
to the  
Nge2 King's Indian

The King's Indian seems to present White with a classic 'man or mouse' decision: take Black on in one of the critical main lines, or dodge the issue with an innocuous sideline.

If you are tired of keeping up to date with rapidly-changing main-line theory, but don't want to squeak your way through the opening, the Hungarian Attack offers a very welcome 'third way'. It is a positionally sound system which also offers White attacking chances against the black king -- Black can easily end up in a hopeless position without doing anything obviously wrong.

This book guides you through the main themes of the Hungarian Attack and presents you with a well-organized repertoire, which also includes lines against the Benoni.

- A complete and potentially deadly system against the King's Indian
- Co-author Forintos is the world's leading expert on this opening
- The first thorough coverage of an aggressive system with surprise value

Everyman's Easy Guide series represents a new approach to chess openings books: just enough detail and just enough explanation to enable readers to play an opening with confidence, without months of memorizing theory: *the easy way to master a chess opening*.

Grandmaster **Győző Forintos** was Hungarian Champion in 1968/9 and became a grandmaster in 1974. He has been the leading practitioner of the Hungarian Attack for more than 30 years.

International Master **Ervín Haag** is a respected theoretician who collaborated with Forintos in a well-regarded work on the Petroff Defence.
